PROFESSIONAL EXPERIENCE

FloodSense an IOT Based Flood Monitoring System for North CaloocanJan – May 2026

Lead Developer · Thesis Project

- Developed an end-to-end IoT flood monitoring system using ESP32 and ultrasonic sensors for real-time water level detection.
- Integrated an AI-powered chatbot for flood updates, safety guidance, and emergency information.
- Built a Node.js + Express + MongoDB backend handling real-time data updates every 2–5 seconds.
- Created a React + Vite web app with offline support via Service Workers + IndexedDB for network-disruption resilience.
- Designed an interactive system combining sensor data + community reports for accurate monitoring.
- Achieved low-latency data transmission (<2 sec delay) for faster situational awareness and response.

GC Web Experts · Caloocan City, Metro ManilaJun – Aug 2025

WordPress Developer

- Enhanced website functionality by implementing custom WordPress themes and plugins.
- Updated website content, managed image uploads, and conducted on-page SEO optimization.
- Collaborated with clients or team members to implement design changes and improve overall site usability.
- Optimized website performance through image compression, caching, and responsive design techniques.
- Performed on-page SEO optimization (meta tags, keywords, site structure) to improve search visibility.

MindMate – AI-Powered Mental Health ChatbotNov 2023 – Jan 2024

Developer

- Developed an AI-driven chatbot to provide mental health support and user interaction.
- Integrated conversational AI using API-based language models for real-time responses.
- Built a responsive web interface using modern frontend technologies.
- Implemented API integration to connect frontend interactions with AI-generated responses.
- Focused on user experience and accessibility, ensuring smooth interaction and reliable chatbot performance.

TRAININGS & SEMINARS

- Google Developers Group Build With AI: The Future of AI & Research (June 2026)
- Microsoft Fabric + Foundry Workshop (June 2026)
- Global AI Manila AgentCamp (Feb 2026)
- Google Certified Gemini AI Educator (Dec 2025)
- Microsoft Season of AI – MCP (Dec 2025)
- The Code and Cloud Agentic Workshop (November 2025)
- Microsoft Generative AI (August 2025)
